## **DETAILED ACTION**

Page 2

- 1. Claims 1-7, 10, 11, 13-15, 17, 18, 31, 32, 76-84 are pending and are under consideration in this Office Action.
- 2. The rejection of claims 1-7, 10, 11, 13-15, 17, 18, 31, 32, and 76 under 35 U.S.C. 112, first paragraph, as failing to meet the written description requirement has been withdrawn in view of applicants' amendment to the claims to recites that the claimed nucleic acid encodes an ATP-binding cassette (ABC) family sterol transporter.

## Claim Rejections - 35 U.S.C. § 112, 1st Paragraph

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

  The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 1, 2, 4-7, 10, 13-15, 17, 18, 31, 32, and 76-82 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an isolated polynucleotide encoding a polypeptide comprising the amino acid sequence of SEQ ID NO:3 or an isolated polynucleotide comprising SEQ ID NO: 4; does not reasonably provide enablement for any other embodiment.

Applicants' arguments filed 10/21/2004 have been fully considered but they are not persuasive. Applicants' position is that the amendments to the claims obviate the enablement rejection stated in the previous Office Action. The Examiner respectfully disagrees for reasons of record and reasons stated below.

The claims are still directed toward polynucleotides that encode polypeptides that are 75%, 80%, 90%, or 95% identical to SEQ ID NO: 3 which are not enabled by the specification. As stated in the previous Office Action, the amount of experimentation to make the claimed polynucleotides is undue and entails selecting specific nucleotides to change (deletion, insertion, substitution, or combinations thereof) in a polynucleotide to make a polynucleotide that encodes a polypeptide that comprises an amino acid sequence that is at least 75%, 80%, 90%, or 95%

identical to SEQ ID NO: 3 and determining by assays whether the polypeptide has ABC sterol transporter activity. Furthermore, the amount of experimentation to make the nucleic acid of claim 2 is undue and entails searching and screening for any polypeptide that binds to any polyclonal antibody generated against SEQ ID NO: 3. Teachings regarding screening and searching for the claimed invention is not guidance for making the claimed invention. Thus, claims 1, 2, 4-7, 10, 13-15, 17, 18, 31, 32, and 76-82 do not meet the enablement requirement.

Page 3

## Conclusion

- 5. Claims 83 and 84 are allowed.
- 6. Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. **THIS ACTION IS MADE FINAL**. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian L Fronda whose telephone number is (571)272-0929. The examiner can normally be reached Monday-Friday between 9:00AM 5:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura N Achutamurthy can be reached on (571)272-0928. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.
- 9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications

Art Unit: 1652

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
